

# SPEAKER INFO

20<sup>th</sup> Jan  
2017

---

### **Philippa Matthews – Clinical academic**

Philippa is a research fellow working on chronic hepatitis B infection, funded by the Wellcome Trust. She is also an honorary consultant in infectious diseases and microbiology at Oxford University Hospitals. She is involved in public engagement work funded by the Wellcome Trust and the Royal College of Pathologists. This conference is convened as a result of Philippa's work to promote dialogue between a variety of stakeholders in academic publishing.

### **Robert Kiley – Wellcome Trust**

Robert Kiley is currently acting as Open Research Development Lead, at the Wellcome Trust where he is responsible for developing a new open research strategy. Over the past decade Robert has played a leading role in the implementation of Wellcome's open access policy and overseeing the development of the Europe PubMed Central repository. Robert also acts as the Trust's point of contact for eLife, the new top-tier, open-access research journal, launched in 2012 with the support of the Howard Hughes Medical Institute, the Max Planck Society and the Wellcome Trust and more recently championed the work to create a new open publishing platform for Wellcome researchers – Wellcome Open Research. Robert is a qualified librarian and an Associate Member of CILIP, and also sits as a Director on the ORCID Board.

### **Rebecca Lawrence - F1000**

Rebecca is Managing Director of F1000, providers of a series of tools and services to support the research community in writing, publishing, discovering and evaluating new scientific findings. She was responsible for the launch in January 2013 of the novel open science and open data publishing platform F1000Research. She has subsequently led the initiative behind the recent launch of Wellcome Open Research, a new publishing platform owned by Wellcome but run by F1000 that aims to start a new trajectory in the way scientific findings and data are communicated and ultimately research and researchers are evaluated. She is a member of the High-Level Advisory Group for the EU's Open Science Policy Platform. She has also been co-Chair of several working groups focussing on data and peer review, for organisations including the Research Data Alliance (RDA), CASRAI and ORCID. She is an Advisory Group member for JISC's Journal Research Data Policy Registry, and for the data policy and standards initiative, Biosharing. She has worked in STM publishing for 15 years for several publishers including Elsevier Life Sciences. She originally trained and qualified as a pharmacist, and holds a PhD in Cardiovascular Pharmacology.

**Mark Patterson - Executive Director eLife**

Mark began his career as a geneticist and moved into publishing in 1994. Inspired in part by the power of making genetic data publicly available, he leapt at the chance to get involved in open-access publishing first with PLOS in 2003 and then with eLife in 2011. As a collaboration between funders and researchers, eLife is designed to explore ways to improve the way research communication works, in terms of evaluation, presentation and reuse of scientific findings and ideas.

Twitter: @elife

**John Inglis - BioRxiv**

Dr. John Inglis is the co-founder of bioRxiv, Cold Spring Harbor Laboratory's preprint service for the life sciences. He is also the founding Executive Director and Publisher of Cold Spring Harbor Laboratory Press in New York, a not-for-profit publisher of journals, books, and online media in molecular and cellular biology. He graduated from the University of Edinburgh Medical School with a Ph.D. in immunology and was previously Assistant Editor of *The Lancet*, founding editor of *Trends in Immunology*, and managing editor of other Trends journals.

**Susanna Assunta Sansone, Oxford e-Research and Scientific Data**

Susanna Assunta Sansone is an Associate Director at the University of Oxford e-Research Centre and a consultant at Springer Nature, where she is the Founding Academic Editor of the *Scientific Data* open access journal. At the Centre, Susanna leads a research group working on knowledge and information management, and interoperability of applications, to support data reproducibility and the evolution of scholarly publishing. She works with several publishers, researchers, funders and service providers in the life, environmental and biomedical sciences. Among her UK RCs and EU funded projects, she is a co-Investigator of the nascent ELIXIR UK Node and the international partner in two NIH Big Data to Knowledge Centers of Excellence, working on data curation, standardization and discovery. She is also vice-chair of the Dryad board and advisory of Force11 working on the future of scholarly communication and publishing

**Howard Noble, Rowan Wilson, Martin Hadley – Oxford University Academic IT**

Martin Hadley is an Academic Research Technology Specialist and specialises in data analysis and visualisation. Howard Noble is the Research Support team manager. He designs and leads projects, and is currently focused on improved support for Research Data Management; he has also been involved in planning today's meeting. Rowan Wilson is a specialist in digital copyright and licensing issues, including free and open source software, Creative Commons and open data licensing.

Email: [researchsupport@it.ox.ac.uk](mailto:researchsupport@it.ox.ac.uk).

**Geraldine Clement-Stoneham, MRC**

Geraldine is the Knowledge and Information Manager at the Medical Research Council. She works with colleagues and stakeholders in the UK and internationally to develop and implement common policies and activities in relation to open access and data sharing. Geraldine is a member of the Europe PubMed Central Funder Committee.

**Tom Culley, Laura Harvey - Publons**

Publons is the home of expert peer review. Over 100,000 experts use Publons to effortlessly track their peer review and editorial contributions, without revealing any sensitive information. Now researchers have proof of how often their expertise is relied upon to ensure the quality and integrity of research. Publons also works with journals, publishers and institutions to improve the process of getting peer review done, so better research is published faster.

Tom is the Marketing Director at Publons. He focuses on spreading the word about the critical importance of peer review. With a background in public policy, Tom is aware of the need to communicate credible research to the public and decision makers. He believes that if we start recognising the value and expertise of peer review contributions, research and society will be better off. Laura is Head of Publisher Relations and works with publishers, reviewers, editors and authors to help them get the most out of Publons. She has over 6 years of experience in STM publishing, and a distant background in Chemistry.

**Louise Page, PLOS**

Louise is a publisher at PLOS, where she is a key leader in PLOS' continued innovative drive to enable transparent, collaborative, and barrier-free scientific communication. Over the past 25 years, Louise has held strategic planning, business development, editorial outreach, and pivotal leadership roles using transformative technology to advance scholarship at HighWire Press, John Wiley & Sons, and Oxford University Press. At Wiley, she launched their first online journal in 1995 and Wiley InterScience shortly afterwards.

**Lucy Oates – Oxford University Press**

Lucy Oates is a Publisher for open access at Oxford University Press, supporting OUP's open access programme. OUP has been publishing OA content since 2004 and the current journals programme includes fully open access and hybrid journals, with self-archiving options for authors.

URL: <http://global.oup.com/>

**Maria Levchenko - Europe PMC**

Maria is a community manager for Europe PMC – a global database for life science and biomedical research literature, a partner in PubMed Central International, and the designated repository for the open access publication mandates of 27 life science funders. Before joining Europe PMC at EMBL-EBI, Maria has obtained a PhD in biochemistry from Goettingen University and has briefly worked with the European Research Council Executive Agency.

**Sally Rumsey, Juliet Ralph – Bodleian Libraries, Open Access Oxford**

Sally Rumsey (Head of Scholarly Communications and Research Data Management, Bodleian Libraries) & Juliet Ralph (Open Access Subject Librarian) are members of the University's Open Access Project Group which provides oversight and coordination on all matters Open Access and advises on priorities and key issues. Sally and Juliet have contributed substantially to the planning and organization of today's meeting.

**Paul Klenerman**

Paul trained in medicine at Cambridge and Oxford and trained in infectious diseases, and has received Wellcome Trust funding from 1992 through the fellowship scheme and since 2016 through an Investigator award to pursue research on immune responses and persistent viruses. He took up the Truelove chair in gastroenterology in 2015 and is currently chair of the Peter Medawar Building.

---

Many thanks to everyone for your support  
in attending this meeting.

Thank you to Bodleian Libraries,  
Oxford University Academic IT,  
the Nuffield Department of Medicine, and  
the Peter Medawar Building Director's Fund  
for their financial support for this event.

Please take the time to fill in online feedback  
at the end of the meeting:
